

HOW WE HELP

PROCESS ENGINEERS

SPECIFY WITH CONFIDENCE

THE VALUE OF TECHNICAL EXPERTISE

When specifying a gasket, the lowest-cost option is rarely the lowest-risk option.

Material selection, manufacturing tolerances, operating conditions and regulatory requirements all influence sealing performance.

At Dobson Gaskets, these are the questions we help engineers answer every day.

WHICH MATERIAL IS RIGHT FOR MY PROCESS?

Successful sealing starts with understanding the application.

We help engineers evaluate:

- ▶ Process media & chemical compatibility
- ▶ Operating temperatures
- ▶ Pressure conditions
- ▶ Regulatory requirements
- ▶ Service life expectations

CAN WE IMPROVE SEALING RELIABILITY?

Our experience across process engineering applications allows us to recommend practical sealing improvements that support operational reliability.

We work with engineers to improve:

- ▶ Leak prevention
- ▶ Maintenance intervals
- ▶ Equipment uptime
- ▶ Long-term operating costs

CAN A DESIGN BE OPTIMISED?

Many sealing challenges are solved before production begins. Our technical team helps ensure the final gasket is designed for both performance and production consistency.

We provide:

- ▶ CAD design support
- ▶ Reverse engineering
- ▶ Prototype development
- ▶ Design refinement for manufacturability

CAN YOU MEET CRITICAL TOLERANCES?

Precision matters in process engineering. Dobson manufactures components with quality built into every stage of manufacture.

We specialise in sealing solutions for applications requiring:

- ▶ Tight dimensional control
- ▶ Repeatable production standards
- ▶ Consistent material performance
- ▶ Reliable fit & sealing integrity

CAN YOU SUPPORT COMPLEX REQUIREMENTS?

Our expertise extends beyond manufacturing, helping engineers solve complex sealing challenges through informed material selection, design and production.

We support projects requiring:

- ▶ Custom gasket design
- ▶ Specialist materials
- ▶ Rapid turnaround
- ▶ Ongoing technical guidance

WHAT QUALITY ASSURANCE SUPPORTS PRODUCTION?

Process engineers require assurance that every component meets specification, compliance and performance requirements.

Our quality assurance processes include:

- ▶ Material traceability
- ▶ Inspection procedures
- ▶ Documented manufacturing controls
- ▶ PPAP support where required

gaskets:**

ENGINEERING EXPERTISE BEHIND EVERY GASKET

For process engineers, the right questions lead to better sealing outcomes.

Dobson Gaskets has helped engineers solve complex sealing challenges for over 60 years.
